Janie Acevedo is available and was going to Durango, CO. I am okay diverting her to NM instead.

I think adding more staff is a good idea. Since Farmington and Aztec are fairly close to each other I wonder if one drinking water person could handle both

David Gray, David Garcia, and Sam Coleman ...what do you think?

We should make a decision this morning to see what Ryan Flynn's reaction is and to incorporate into Mark Hayes bullets.

Carl,

We currently have one R6 OSC in the field and are sending an additional OSC today. We also have 6 START plus 3 more in route this morning supporting sampling activities. Our current operations involve collecting 8 samples each day. These samples will be located at each of the active drinking water intakes.

If we want to put more people in the field, here are my suggestions:

- 2 EPA R6 Drinking water personnel – one located in the Farmington area and one in the Aztec area. These individuals would coordinate with the various drinking water systems in the two areas.
- 1 EPA R6 press expert – coordinate with local press
- 1 EPA R6 Rep at NMED – This person would sit in the NMED office and coordinate information and requests. This person could be me, David Garcia or Angela Restivo.

Need to pull the trigger sooner rather than later. Still need to figure out costs.

Ronnie
